

Typography 1 Course

What some of our students say.....

Anyone who is interested in typography will benefit from a day at The Penrith Museum of Printing. It is always a good thing to know the history of your chosen career path. With all the technology we have available, it is easy to forget where type-setting began.

At the Penrith Museum of Printing, you get to experience type on a level that a computer can't provide –you get to feel the weight of the letters as you prepare a paragraph and get ink under your fingernails! After the one day workshop, I have developed a real appreciation for typesetting and the work that goes into creating a simple paragraph. Thank you for allowing me to step back in time and experience pre-computer typesetting. **Jude**

"I loved the hands on nature of the course with the type setting at the case and the sense of getting to know the type case layout – I had a ball – and can't wait to come back and do more-thanks". **Peter**

"I really liked doing in practice what I had only read, thought and wondered about previously and I liked the feeling of accomplishment -this was very satisfying – really loved the course"
Rebecca

I really loved the small group size and the ability to get to know the letters in the case—
Thanks Steve, I had a wonderful day. **Robyn**
